

HAND HELD PTFZ CONTROLLER H20HHC / H20HHCS / H20SD

H20HHC

H20SD

H20HHCS

The **H20HHC** is a hand held local controller for PTFZ.

Powered by a PP3 9V battery, it will drive the **H2001**, **H2002**, **H2003** and **H2004** pan & tilt units and motorised zoom lenses over cable to a distance of about 200 feet.

A potentiometer allows speed control for the motors.

The **H20HHC** can be used in non-telemetry situations or as a set up tool to check operation, angles etc prior to telemetry connection. It has two identical output sockets for pan & tilt and lens control.

The **H20HHCS** controls P&T as well as the modified Sony 480/780 camera modules.

The **H20SD** is the same as the **H20HHCS** but is housed in a diecast metal box making it 'heavy duty'.
