

H305 - AUDIO PRE-AMPLIFIER

Harristech's H305 Audio Pre-amplifier unit is ideally suited for portable field work due to its small size though the robust casing allows for a safe permanent install also. It weighs less than half a kilogram and its dimensions are 120 x 130x 40mm - including knobs.

Power for these pre-amps is via an Internal 9V battery *OR* an External 12vdc supply.

Some of the main features of the H305 are:

- Microphone & line level inputs with gain control
- Unbalanced microphone level output
- Balanced 600 Ω line output
- Headphone output with separate volume control
- Compact, hand held
- Diecast metal box
